

Pharmacists still have time to help mitigate the effects of climate change

Author(s): Alexander A
Year: 2012
Journal: The Pharmaceutical Journal. 289 (7727): 406-407

Abstract:

Climate change is one of the biggest global health threats. Angela Alexander looks at how pharmacists might reduce their carbon footprint professionally and personally.

Resource Description

Communication:

resource focus on research or methods on how to communicate or frame issues on climate change; surveys of attitudes, knowledge, beliefs about climate change

A focus of content

Communication Audience:

audience to whom the resource is directed

Health Professional

Exposure :

weather or climate related pathway by which climate change affects health

Unspecified Exposure

Geographic Feature:

resource focuses on specific type of geography

None or Unspecified

Geographic Location:

resource focuses on specific location

Global or Unspecified

Health Impact:

specification of health effect or disease related to climate change exposure

General Health Impact

Intervention:

strategy to prepare for or reduce the impact of climate change on health

A focus of content

Medical Community Engagement:

resource focus on how the medical community discusses or acts to address health impacts of climate change

A focus of content

Mitigation/Adaptation:

mitigation or adaptation strategy is a focus of resource

Adaptation, Mitigation

Resource Type:

Climate Change and Human Health Literature Portal

■

format or standard characteristic of resource

Policy/Opinion

Timescale: ■

time period studied

Time Scale Unspecified
